Golden State
Asset Management

Asset allocation cannot eliminate the risk of fluctuating prices and uncertain returns. Strategies are subject to risks including general market risk and risks related to currency fluctuations and economic conditions. Underlying investments fluctuate in price and may be sold at a price lower than the purchase price resulting in a loss of principal. The underlying investments are neither FDIC insured nor guaranteed by the U.S. Government. There may be economic times where all investments are unfavorable and depreciate in value. Clients may lose money. Risk mitigation is NOT a guarantee. Risk mitigation is a strategy that seeks to limit exposure and mitigate loss by changing investment components. There may be times where all investments and strategies are unfavorable and depreciate in value. Future returns are not guaranteed, and a loss of original capital may occur.

Securities offered through LPL Financial, Member FINRA/SIPC. Investment Advice offered through Golden State Asset Management, a registered investment advisor. Golden State Wealth Management and Golden State Asset Management are separate entities from LPL Financial. There is no guarantee that a diversified portfolio will enhance overall returns or outperform a non-diversified portfolio. Diversification does not protect against market risk. No strategy assures success or protects against loss. All investing involves risk including loss of principal. No strategy assures success or protects against loss. There is no guarantee that a diversified portfolio will enhance overall returns or outperform a non-diversified portfolio. Diversification does not protect against market risk.
